Foreword from the Vice Chancellor

Assalamualaikum Warahmatullahi Wabarakatuh and Warm Greetings

Our utmost gratitude to Allah the Almighty, I am able to share and pen down a couple of words and advices to readers of this proforma especially to new students of Universiti Tun Hussein Onn Malaysia (UTHM) whom had just enrolled in this 2020/2021 Academic Session.

Congratulations and welcome to the new students and thank you for believing in UTHM for your continuing endeavour in the search of knowledge towards the success in your future career and life betterment.

For your information, University leadership continues to strive in the search of, designing, and adapting the effective and efficient approaches that would able to produce the highest impact towards making UTHM a top Higher Education Institution. The success in obtaining "QS STARS RATED FOR EXCELLENCE 2015 and UTHM was recognized as the Top 300 in the QS World University Ranking by Subject 2015 for Mechanical, Aeronautical and Manufacturing Engineering, have proven that UTHM continues creating excellence. These successes have convinced the University that these are due to the alignment of University's vision and mission which are continually strengthen and improve.

As the Vice Chancellor, I gave full confidence that UTHM is currently on the right track in the effort towards the success of the 10 Shifts identified in the Malaysia Education Blueprint (Higher Education). Based on the details outlined in the Malaysia Education Blueprint (Higher Education), UTHM is committed in producing human capital and disseminating knowledge to meet the needs of the industry and the community as well as to nurture creative and innovative human capital.

Last but not least, I believe that you will become graduates of the University that will successfully continue the University excellence tradition. When you graduated, you will become the member of society that will not only be able to apply the knowledge gained but also be able to contribute service and expertise for the importance and the needs of Religion, Race and Nation.

PROF. DATUK TS. DR. WAHID BIN RAZZALY

Vice-Chancellor
Universiti Tun Hussein Onn Malaysia

Foreword from the Deputy of Vice Chancellor (Academic and International)

Assalamualaikum Warahmatullahi Wabarakatuh and Warm Greetings

I would like to take this opportunity to express the utmost congratulations and well done to you as the new students whom have been successfully been selected to pursue studies at Universiti Tun Hussein Onn Malaysia for this 2020/2021 session.

I would also like to congratulate Centre for Academic Development and Training that has successfully produced the proforma which will be used as a guide for students in planning the studies beginning from the first semester until the end of the studies at this University.

Detailed planning which is effectively implemented at every semester as well as early preparation of students before attending lectures is very important in ensuring the readiness of learning process. Apart from that, the preparation for co-curriculum program also is important in shaping the personality and social development of students.

I hope that the publication of this proforma can be fully utilized by you in planning your studies at the University and you are capable of obtaining the best results as well as attaining excellent success.

Last but not least, I would like to wish "All the Best" and I pray that you will achieve excellent success in your studies at UTHM and thus can contribute as the human capital towards religion, race and nation development.

Thank you.

.

PROF. DR. ISMAIL BIN ABDUL RAHMAN
Deputy of Vice Chancellor (Academic and
International)
Universiti Tun Hussein Onn Malaysia

Foreword from the Dean of Faculty of Technical & Vocational Education

Assalamualaikum Warahmatullahi Wabarakatuh dan Greetings

As the starting point, I would like to congratulate all new students at the Faculty of Technical and Vocational Education (FPTV) UTHM for the 2020/2021 academic session. All of you are very fortunate to be selected to enter this University compare to many other candidates who have submitted an application to enter to this university, and still seeking for the opportunity to persue their studies. Therefore, you should be grateful and remember that being selected to this university is a great privilege that should not be wasted.

In order to accomplish the University's and FPTV missions which are to produce and train competitive professionals and future teachers of high ethical values, you will be guided by qualified, committed, and responsible academic staff. FPTV offers academic programmes based on four major areas in the field of civil, electrical and mechanical engineering as well as hotel-catering programme. Various educational knowledge skills that will practice in technical and vocational education institutions, nationally and internationaly. Soft skills and gereric skills will be part of the trainings to ensure that students are fully responsible to their learning and instill with the high ethical and good values. To enhance students' understanding and creativity, the faculty provides laboratories equipped with the latest equipment and assisted by well-trained technicians. Students will also have to undergo practical work in the field relevant to the current technical and vocational education needs.

Therefore, you must take this opportunity to work extremely hard in order to achieve the aspirations of not only your parents but also the community and the country. Systematic planning of teaching and learning will produce outstanding and dedicated graduates.

Thank you.

ASSOCIATE PROFESSOR TS. DR ABDUL RASID BIN ABDUL RAZZAQ
Dean
Faculty of Technical & Vocational Education
Universiti Tun Hussein Onn Malaysia

Vision

Towards a world class university in engineering, science and technology for sustainable development

Mission

UTHM is committed to generate and disseminate knowledge, to meet the needs of industry and community and nurturing creative and innovative human capital, based on tauhidic paradigm

University Education Philosophy

The education and training in this university is a continuous effort to lead in the market oriented academic programmes. These programmes are student-focused and are conducted through experiential learning in order to produce well trained human resource and professionals who are catalysts for a sustainable development

University Logo

The logo of Universiti Tun Hussein Onn Malaysia (UTHM) is the pride, identity and idealism of the members of UTHM community. UTHM logo displays a Proton, Book, Tiered Mortar Board, Book Rest and Shield.

The whole concept of the logo symbolises UTHM as an Institution of Higher Learning which supports the growth and development of knowledge at all levels in fields of Science and Technology.

Blue represents a close-knit circle of members of UTHM community which ensures the success and enhancement of its educational and research programmes and activities for the benefits of mankind.

Red symbolises the courage of UTHM in the exploration of new fields as the pioneer in science and technology applications, which reflects the spirit and self-esteem of the members of UTHM community.

Symbolism:

Red: Courage

Blue: Co-operation/Loyalty

Silver: Quality/Prestige

Book Rest: Repository of knowledge

Proton: Science and technology

Book: Knowledge

Mortar board: Levels of study

Shield: Confidence

Faculty Vision

To become a world class resource and referral centre on Technical and Vocational Education Training through research, continuous development as well as technological based teaching and learning processes, in line with the Philosophy of the National Education system to realize the Vision 2020.

Faculty Mission

To educate and train world class, competitive professional human capital in the various discipline, within the technical and vocational education, to explore, expand and apply knowledge and modern technologies, based on the concept of Tauhid.

Faculty Background

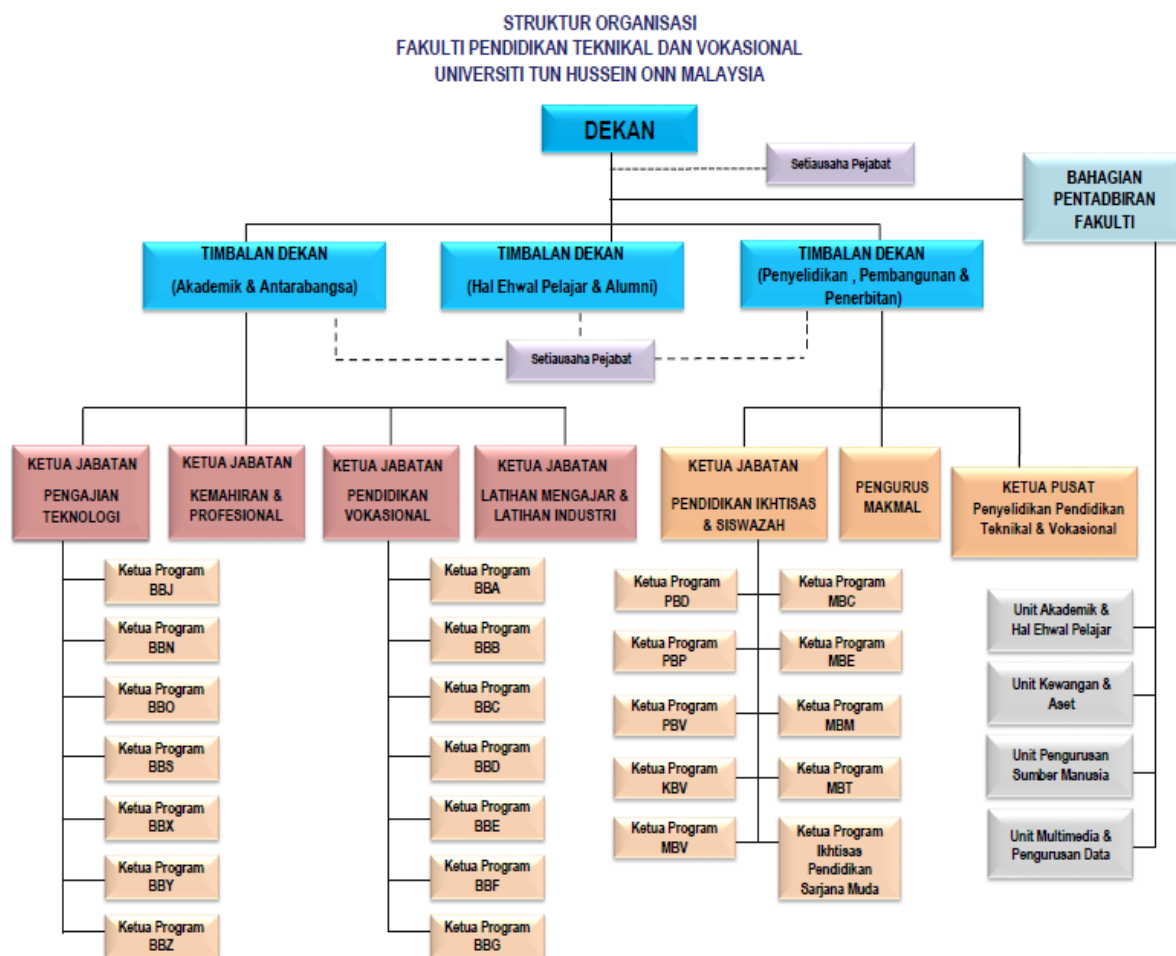

The Faculty of Technical and Vocational Education (FPTV) of the Universiti Tun Hussein Onn Malaysia (UTHM), was formally known as the Faculty of Technical Education (FTE). Our inception began in September 27th, 2000, as the Department of Technical and Vocational Education (DTVE) under the auspices of the Faculty of Engineering Technology, Kolej Universiti Teknologi Tun Hussein Onn (KUiTTHO).

Our renowned excellences in Teachers Training in Technical and Vocational Education and Training (TT-TVET) niche areas is traceable back to the year 1993 when we started as one of the core departments of the Polytechnics Staff Training Centre (PSTC) that produced qualified polytechnics lecturers and instructors. PSTC was upgraded and renamed as Kolej Universiti Teknologi Tun Hussein Onn (KUiTTHO) on May 1998. On May 27th, 2000, the department was restructured and renamed as the Department of Technical and Vocational Education (DTVE) under the auspices of the Faculty of Engineering Technology, KUiTTHO. On May 1st, 2004, the department was upgraded as the Faculty of Technical Education with the dissolution of Department of Engineering Technology. The rebranding of the faculty to the present new name, is endorsed by the Ministry of Higher Education on June 23rd, 2011, to reflect our continuous and significant contributions to the rapid changes and transformation of the Technical and Vocational Education (TVET) Systems, both locally and abroad.

Today, FPTV has developed to become the major provider and referral centre of high quality TT-TVET programmes, researches and consultancies. Since 2002, UNESCO-UNEVOC Bonn entrusted the faculty to carry the role as UNESCO-UNEVOC Associate Centre and ultimately in 2005, the faculty has become UNESCO-UNEVOC centre in Malaysia. FPTV does not stand alone in making reputation to its credentials. Collaborations and networking with regional and international organizations such as Southeast Asian Ministers of Education Organization Regional Centre for Vocational and Technical Education and Training (SEAMEO VOCTECH), Korea Research Institute for Vocational Education and Training (KRIVET), Colombo Plan Staff College for Technician Education Philippines (CPSC), The National Centre for Career and Technical Education USA (NCCTE), European Centre for the Development of Vocational Training (CEDEFOP) and others have been made as initiatives to upgrade the quality and credibility of technical and vocational education for the benefit of all.

FPTV is the professional faculty with niche in TT-TVET. The faculty offers a range of quality academically balanced and practical-oriented programmes to meet the changing needs of the teaching and training sectors of the economy. Our programmes of study are dynamics that leads the rapidly transformation of TVET both regional and worldwide. Our qualified and experienced academics and supporting staffs are dedicated to providing a high standard and *state-of-the-art* theoretical and practical knowledge in a stimulating and innovative learning atmosphere.

The faculty, consisted of four (5) departments and a research center that is led by a Dean and assisted by three (3) Deputy Deans. Organisation chart of FPTV is depicted the diagram overleaf.

UHB 10102 English for Higher Education

Prerequisite Course(s): None

Synopsis

This course exposes students to English language learning in higher education and enhances their study skills. Students have opportunities to learn about using technological affordance in listening to lectures, note taking, library and internet research, conducting academic group discussions, preparing and delivering presentations and writing academic report. The course also provides opportunities for student to acquire learning skills that facilitate the transition to tertiary education. Aspects of English language oral and written skills that are most relevant to students in their academic work will be reinforced.

BBP 17303 Introduction to Hospitality Tourism

Prerequisite course (s): none

Synopsis

This course is designed to provide students with basic information about hospitality and tourism. Travel and tourism is now the largest industry in the world: In the United States alone, over 7.5 million people work in this industry, and in 2010, 60 million international visitors came to the United States, spending \$134 billion. All of the sectors of the travel and tourism industry work together to serve this growing market of visitors, who have a significant impact on the U.S. economy. This course establishes a foundation for the concept of tourism, travel, and hospitality as a system. Students will learn about the various segments of the travel and tourism industry and how they are interrelated and integral to international and domestic travel and tourism. This discussion will include travel agencies, tour companies, the airlines and other transportation sectors, lodging facilities, cruise lines, and marketing companies.

BBP 17503 Development of Professionalism in Hospitality

Prerequisite Course(s): None

Synopsis

This course will involve the student in enhancement of their personal hospitality skills. The student will research and share interactively on the topic of current catering development, work ethics within the food and beverage industry, catering facilities and equipment, menu studies, technical competency of a food and beverage staff, mise-en-place, plated service, silver plated service, Chinese, Malay, Indian and Buffet service.

The hospitality industry is a consistent form of employment in many areas, and a great place for young people to break into the professional world. While many positions are entry-level, others demand much skill and offer both great prestige and excellent compensation. Organisations operating in the hospitality sector are in the business of serving people, be that through food, drink, accommodation or a combination these and a range of other services. Those who work within hospitality, regardless of job function, play an essential role in the overall customer experience.

The ability to recognise the role and level of influence that each member of the team has on the customer experience can have a major impact on business prosperity and reputation. Many hospitality workers start in entry-level positions and work their way up into higher level jobs. When a company takes the time to train people, it is easier to recognize the talent that can be developed for higher management positions. Training for the hospitality industry is diverse. Basic skills include communication and ways to interact with the hotel guests. It also involves teamwork training and diversity training, because the staff is perceived as one unit by guests. Learning to work together with people from different backgrounds is essential since staff never know what the background of any specific guest will be. Yet the guest experience needs to be the same for everyone.

BBP 17603 Food Safety and Sanitation Management

Prerequisite Course(s): None

Synopsis

Food hygiene are the conditions and measures necessary to ensure the safety of food from production to consumption. Food can become contaminated at any point during slaughtering or harvesting, processing, storage, distribution, transportation and preparation. Food hygiene and safety usually refer to contamination with 'microorganisms' or 'microbes'; whereas in communicable diseases, the term 'infectious agents' is preferred. The term 'food hygiene' refers particularly to the practices that prevent microbial contamination of food at all points along the chain from farm to table. Food safety is a closely related but broader concept that means food is free from all possible contaminants and hazards. In practice both terms may be used interchangeably.

Food hygiene is vital for creating and maintaining hygienic and healthy conditions for the production and consumption of the food that we eat.

BBP 37503 Hospitality Marketing

Prerequisite Course(s): None

Synopsis

This course is designed to provide students the fundamentals of hospitality marketing. Hospitality marketing programs aim to familiarize students with the various stages of marketing campaigns and how those can be tailored to the hospitality industry. Students will also gain an understanding of topics such as analysis of the latest trends affecting the industry and the most effective ways to attract clients for hospitality events. Courses may focus on sales, marketing, management and consumer behavior

As the hospitality industry continues to grow and independent properties gain even more traction, it's key to look into the marketing trends that will define the year. Marketing is a powerful tool that has the ability to make or break a business, or even an entire destination. Hospitality marketing is marketing efforts directed towards the increase of revenue in the hospitality industry. Marketing is the process for getting a company's product or service out to consumers. Hospitality marketing takes a look at how segments of the hospitality industry, such as hotels, restaurants, resorts and amusement parks, utilize marketing techniques to promote their products or services. It is important to take a close look at how different areas of the hospitality industry (hotels, resorts, amusement parks, lodges, etc.) can benefit from marketing techniques. Some of these techniques might include things like products, mailings or services. Typically, a specialized team of professionals will study a company and decide what the optimal demographic is to try and reach. Once that is determined, it will be decided what the best way to reach these people is. It might be through social media, by e-mail, by mailing or by offering a promotion that will be expressed by way of a television or radio advertisement.

BBP 37603 Hospitality Training Management

Prerequisite Course(s): None

Synopsis

This course provides student with the understanding and enable them to conduct training secession as what they have planned in order to strengthen the technical and soft skills in the tourism and hospitality sector. Students will be exposed with the principal of training designing and then they have to apply the knowledge to conduct an interaction and effective training program. Students also need to carry out evaluation secession to get the feedback on the effectiveness of any training secession that they have organized.

Hospitality management focuses on ensuring customer safety and comfort in a hotel, restaurant or entertainment facility. Hospitality management centers on customer satisfaction that would lead to his loyalty and repeated business. Students in hospitality management usually have the opportunity to receive hands-on experience in real hospitality organizations. Hospitality management integrates theories from similar disciplines like: commerce, business administration and supply chain management and logistics. The Training Manager is crucial to the success of your hospitality business. They are responsible for creating and implementing training programs and overseeing the development of careers. They set performance metrics, evaluate productivity and help employees create long-term career plans within an organization.

BBK 27303 Menu Design for Catering

Prerequisite Course(s): None

Synopsis

Menu design or menu engineering sometimes called 'Menu Psychology', the term menu engineering is generally adopted as a standard Best Practice within the Hospitality and Restaurant Industries. The objective with menu engineering is to maximize a concept's profitability by leading the customer to certain purchases, and avoiding others, in addition to 'engineering' recipes to maximize profits at product and category level.

When creating a menu design, you want to show off your best dishes, but you don't want them to overshadow other options that might turn out to be #1 sellers. You'll want to strategically place the best-made and the #1 sellers near the top of each category (appetizers, entrees, desserts, drinks, etc.) on your menu. A reader will naturally gravitate toward the top items first, then to the bottom of the list, and finally glance at the remaining portion in the middle. Add in high-quality photographs of these top dishes, accompanied by the dish name, so readers can identify it and find it in the list below.

Once customers reach the list of dish options, the presentation of price and ingredients comes into play and is one of the final decision points. Consider dropping the "\$" and the word "dollars" from your pricing. According to F&B Kibbutz and a study done by Cornell University's Center for Hospitality Research, sales increased by 8% per person with the removal of the symbol and word! The result is that your customers think about how good their meal will taste – not how much money they'll have to spend.

Visual perception is inextricably linked to how customers read a menu. By strategically arranging menu items and categories within the pages of the menu, operators can promote high profit dishes while allowing less profitable dishes to be

under stated. This strategy enhances the sales mix profitability, and thus represents a key element in the business's strategy.

BBK 27103 Skills & Ethics in Food and Beverage Service

Prerequisite Course(s): None

Synopsis

This course will engage students in an interactive learning process as business oriented person. Food is a pretty universal source of joy and comfort. It spans all cultures, nations and even species -- every living thing shows appreciation in some way for a good meal. The preparation of food is an integral part of every culture, and the reactions to it are nothing short of inspirational.

The hospitality industry is a consistent form of employment in many areas, and a great place for young people to break into the professional world. While many positions are entry-level, others demand much skill and offer both great prestige and excellent compensation. Food service includes everything from fast food to working as a server in a high-end restaurant. All of these jobs require excellent customer service skills, careful attention to detail (forgetting a minor detail could give a customer food poisoning or trigger a life-threatening allergy), and a thorough knowledge of the restaurant's current offerings. The work is fast-paced, and a good memory is crucial.

Food and beverage preparation may include customer service (for example, for bar tenders or coffee baristas), or these jobs may be entirely behind the scenes (for example, line cooks). In addition to specific skill using the tools of the trade, such as espresso machines and kitchen equipment, more general abilities are absolutely required. These include, again, attention to detail, plus a commitment to safety, the ability to work well as part of a team, and the ability to work quickly and calmly in a high-pressure environment.

BBK 27503 Bakery and Pastry Skills

Prerequisite Course(s): BBP 17603 Food Safety and Sanitation Management

Synopsis

This course will provide introduce students with the basic knowledge and skills in making bakery and confectionery products. introduce provide knowledge and improve skills in the production of bakery and confectionery products.

Baking is a method of cooking food that uses prolonged dry heat, normally in an oven, but also in hot ashes, or on hot stones. The most common baked item is bread but many other types of foods are baked. Heat is gradually transferred "from the surface of cakes, cookies, and breads to their centre. As heat travels through, it transforms batters and doughs into baked goods with a firm dry crust and a softer centre".

Pastry is a dough of flour, water and shortening (solid fats, including butter) that may be savoury or sweetened. Sweetened pastries are often described as bakers' confectionery. The word "pastries" suggests many kinds of baked products made from ingredients such as flour, sugar, milk, butter, shortening, baking powder, and eggs. Small tarts and other sweet baked products are called pastries. The French word *pâtisserie* is also used in English (with or without the accent) for the same foods. Common pastry dishes include pies, tarts, quiches and pasties.

BBP 40408 Teaching Training

Prerequisite Course(s): Pedagogy (BBD10302), Micro Teaching (BBD20403)

Synopsis

This course focuses on Teaching Preparation: writing teaching schedule, annual teaching plan, weekly teaching plan, daily lesson plan. Implementation of teaching plans: Teaching: pre-teaching skills, induction set skills, presentation skills, questioning skills and assessments, teaching using teaching aids, classroom control, cover. Reflection: oral feedback from instructors / supervisors, supervisor / supervisor feedback through evaluation instruments, teaching, reflection writing in teaching planning books. Routine work: management and administration, job examinations /

student assignments, continuous assessment, lab management and workshops, other instructional tasks, preparation of teaching training portfolios.

BBP 30404 Industrial Training

Prerequisite Course(s): Students need to complete the all related core courses

Synopsis

This course focuses on the planning. Throughout planning Period of Industrial Training. Monthly Planning. Weekly planning. Project planning. Daily Duties. Briefing Supervisors. Implementation Assignment. Communication. Log book. The scope of the project. Task Completion. Learning. Reflection. Studies Organization. Organisational structure. Communication Channels. Climate Organization. Current development of Organization. Practices and Work Procedure. Report Writing. Writing format. Presentation. Documents Attachment and Presentation Materials.

BBK 37703 Bakery & Pastry Professional

Prerequisite Course(s):

1. BBP 17603 FOOD SAFETY AND SANITATION MANAGEMENT
2. BBK 27503 BAKERY AND PASTRY SKILLS

Synopsis

This course allows students to provide knowledge and enhance skills in bakery and confectionery production. Students will be systematically involved in bakery and confidentiality activities to produce the best quality products.

Baking is a method of cooking food that uses prolonged dry heat, normally in an oven, but also in hot ashes, or on hot stones. The most common baked item is bread but many other types of foods are baked. Heat is gradually transferred "from the surface of cakes, cookies, and breads to their centre. As heat travels through, it transforms batters and doughs into baked goods with a firm dry crust and a softer centre".

Pastry is a dough of flour, water and shortening (solid fats, including butter) that may be savoury or sweetened. Sweetened pastries are often described as bakers' confectionery. The word "pastries" suggests many kinds of baked products made from ingredients such as flour, sugar, milk, butter, shortening, baking powder, and eggs.

Small tarts and other sweet baked products are called pastries. The French word *pâtisserie* is also used in English (with or without the accent) for the same foods. Common pastry dishes include pies, tarts, quiches and pasties.

BBK 17703 Introduction to Culinary Arts

Prerequisite Course(s):

BBP 17603 FOOD SAFETY AND SANITATION MANAGEMENT

Synopsis

The course will assist the students to grasp the significance of develop and demonstrate skills in a planned culinary activity that will allow them to effectively function to procedure standard in service establishments.

Introduction to Culinary Arts is the foundational course designed to introduce students to fundamental food preparation terms, concepts, and methods in Culinary Arts where laboratory practice will parallel class work. Fundamental techniques, skills, and terminology are covered and mastered with an emphasis on basic kitchen and dining room safety, sanitation, equipment maintenance and operation procedures. The course also provides an overview of the professionalism in the culinary industry and career opportunities leading into a career pathway to Culinary Arts.

BBK 37603 Culinary Arts Professional

Prerequisite Course(s): BBK 27603 Culinary Arts essential Practices

Synopsis

This course will give students the opportunity to extend the content and enhance the skills introduced in Culinary Arts. Students will evaluate global cuisines including the culture, history, and indigenous ingredients; develop a comprehensive protein product knowledge including fish and shellfish products; develop advanced pastry and baking skills; and evaluate nutrition concepts as they affect health and wellness.

Culinary arts, in which culinary means "related to cooking", are the arts of preparation, cooking and presentation of food, usually in the form of meals. People working in this field – especially in establishments such as restaurants – are commonly called "chefs" or "cooks", although, at its most general, the terms "culinary artist" and "culinarian" are also used. Table manners ("the table arts") are sometimes referred to as a culinary art.

Expert Culinarians are required to have knowledge of food science, nutrition and diet and are responsible for preparing meals that are as

pleasing to the eye as well as to the palate. After restaurants, their primary places of work include delicatessens and relatively large institutions such as hotels and hospitals.

BBK 37503 Cafeteria Operation

Prerequisite Course(s):

BBP 17603 Food Safety and Sanitation Management

Synopsis

This course is intended to consolidate the knowledge and competency of the student in planning and managing catering related projects. The student will engage in interactive teaching and learning process related to Basic Project Elements, Catering Scope, Time Management, Resource Management and Profit Management and Project Documentation. The student has to work in group and prepare a project proposal and executing the project after approval.

BBK 47203 Food Service Professional

Prerequisite Course(s): BBK 27103 Skills and Ethics For F&B Service

Synopsis

This course will engage students in an interactive learning process in Quality foodservice, Innovations in foodservice, Gueridon Service, Banquet Catering, Understanding Protocol and Table Etiquette and Management's Role in Service. Students are encouraged to explore the art of foodservice professional and creating new ideas and innovations. Students too, are encouraged to organize any service training or workshop, or competition to ensure a quality foodservice professional.

The hospitality industry is a consistent form of employment in many areas, and a great place for young people to break into the professional world. While many positions are entry-level, others demand much skill and offer both great prestige and excellent compensation. Food service includes everything from fast food to working as a server in a high-end restaurant. All of these jobs require excellent customer service skills, careful attention to detail (forgetting a minor detail could give a customer food poisoning or trigger a life-threatening allergy), and a thorough knowledge of the restaurant's current offerings. The work is fast-paced, and a good memory is crucial.

Food and beverage preparation may include customer service (for example, for bar tenders or coffee baristas), or these jobs may be entirely behind the scenes (for example, line cooks). In addition to specific skill using the tools of the trade, such as espresso machines and kitchen equipment, more general abilities are absolutely required. These include, again, attention to detail, plus a commitment to safety, the ability to work well as part of a team, and the ability to work quickly and calmly in a high-pressure environment.

Prerequisite Course(s): None

Synopsis

This course will be involved the students with interactive teaching and learning process on Kitchen Design Principles, Space Management, Physical facilities for catering, Flooring, Other Design Consideration with used Computer Design Software.

For an organization to have an effective and efficient manufacturing unit, it is important that special attention is given to facility layout. Facility layout is an arrangement of different aspects of manufacturing in an appropriate manner as to achieve desired production results. Facility layout considers available space, final product, safety of users and facility and convenience of operations.

An effective facility layout ensures that there is a smooth and steady flow of production material, equipment and manpower at minimum cost. Facility layout looks at physical allocation of space for economic activity in the plant. Therefore, main objective of the facility layout planning is to design effective workflow as to make equipment and workers more productive.

The seemingly minor details in a kitchen (grout, moldings, etc.) are truly a big deal in terms of keeping guests safer. And bigger issues—such as placement of a three-compartment sink—must be carefully considered at the start of a design project. While it's critical to have a competent design and construction team for your project, don't overlook the importance of having a food safety expert consult on the project from concept to implementation. Food safety experts bring a valuable perspective to the table, and can advise on all matters from big (how kitchen design impacts food safety and reduces foodborne illness risks) to small (the easiest gaskets to clean and keep sanitary). By working collaboratively, your design, construction and food safety expert can maximize your future successes and minimize food safety risks.

BBK 47603 Food & Beverage Artistry

Prerequisite Course(s): None

Synopsis

This course will involve student in the process of accumulating competencies and interactive instructional assignment in introduction to Food and beverage Presentation, Food Garnishing, Fruit Presentation, Fruit and Vegetable Carving, Beverage Presentation, Food and Beverage Photography, Food and Beverage Presentation for Event and Advance Research in food presentation and Analysis

Proper presentation of food can almost be as essential as its preparation. Professional food stylists are artists with a culinary flair. The food stylist must use color, shape, texture and food compatibility to create an artistic plate; one which is as appetizing as it is beautiful. Food stylists work in various industries; for photographers, magazines, restaurants and catering companies. Cooking or otherwise preparing the food is the next step. As mentioned above, some types of food are not cooked all the way through, just enough to make them look edible. Tools like blowtorches or even hair dryers can be used to brown and scorch the edges of the meat.

The food is then arranged on the plate so that it appears as attractive and scrumptious as possible. Also mentioned above, food stylists have a number of different sneaky little tricks to make this possible.

Employment

Graduates have career opportunities in the public and private sector, particularly in the field of technical and vocational education. In addition to being an educator, graduates can also engage in industrial fields such as in supervisor or manager that focuses on the kitchen, restaurant or foodservice catering outlet. The graduates also have the potential to become entrepreneurs in related fields. Graduates also have the opportunity to continue their studies at post-graduate level in areas related to technical and vocational education through programs such as Master of Technical and Vocational Education and Master of Technical Education (Instructional Design and Technology) and programs equivalent.
